

DS & IA Community of Interest

Demonstration: Project COEUS

**Senior
Leader:**
Ms. Susan
Goodyear,
SES
Deputy Chief
Executive
Officer
AFC

Presenter:
LTC Isaac
Faber
AI Factory
Director
AI2C

COI OPENING SPEAKER: Ms. Susan Goodyear

Ms. Goodyear serves as the Executive Deputy to the Commanding General at Army Futures Command. Army Futures Command is charged with force design, force development, and is the capabilities developer and operational architect for the future Army. Futures Command is partnering with the entire Army community to integrate Artificial Intelligence, Software at the Edge, and digital decision-making into the future battlefield.

COI TOPIC PRESENTER: LTC Isaac Faber

Coeus is the Army's enterprise platform for Artificial Intelligence/Machine Learning (AI/ML) development. It is a collaborative workspace for data engineers and scientists with centralized access to data, code, and other projects. Coeus provides a flexible, cloud-native platform to support candidate AI/ML model testing and evaluation, data labeling, model training, and data product automation and dissemination. The platform enables the discovery, sharing, and reuse of artifacts to accelerate algorithm development for faster delivery to the field.

When: Wednesday, 25 May 2022 from 3 - 4pm EDT
